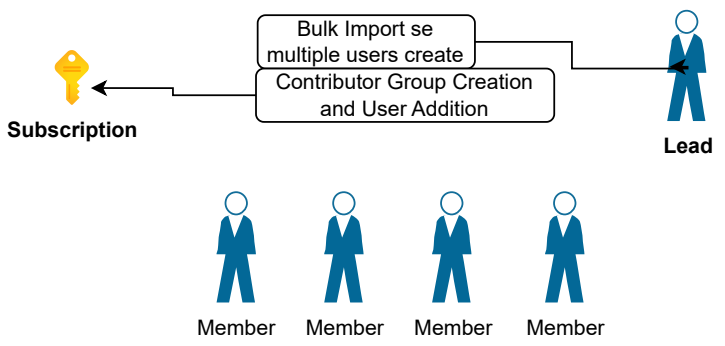
Kahani Abhi tak...

- 1 Tier on Windows IIS ✓
- 1 Tier on Killercoda ✓
- 1 Tier on DevOps Insiders Cloud ✓
- 1 Tier on Azure Cloud ✓



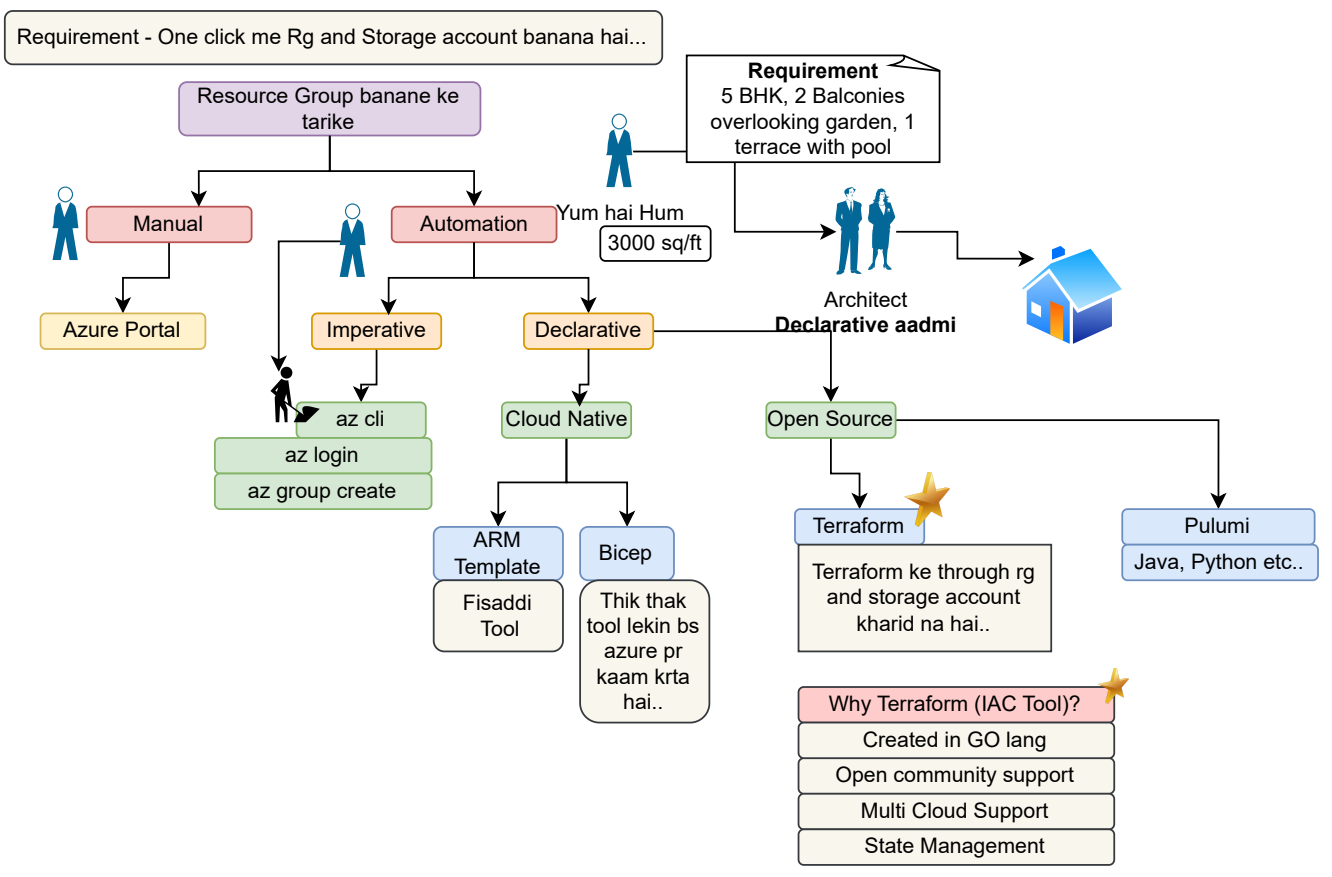
Kal access milne ke baad..

- View me access karke check karna hai
- Contributor hona chahiye..
- Manual Click click karke Resource Group banana hai..
- Az cli se Rg banana hai aur mast muska dena hai...
- Iske baad storage account banana hai, Manual click click karke document padke..
- Concept samajhna hai bs... Region Zone wala..

Kabhi bhi chatbots ka use jab tak bola na jae, tab tak nahi karna hai... Jab tak 20-25 resource concept se manually nahi bana le, haath chalana nahi sikh jae..

Chatbot se concept ko pada jaa sakta hai, Code hmesha google se document se likhna hai...

Bina pendi ka Lota
Nahi ban na hai



Terraform

- Kon banaya - Hashicorp ne banaya IBM ne kharida
- Kon Language me Bana - Go Lang
- Open Source - code available on GitHub
- Hum likhenge Code HCL lang me
- Hashicorp Language very very easy language

Jis tarike se humne Azure CLI ke through RG and Storaeg account banaya

az cli

1. Install Az cli (az)
2. az login
   (aapke user ko azure subscription pr contributor access hona chahiye)
3. az cli ka command likha
4. az cli ka command chalaya
5. Rg ban gya mast

terraform

1. Install Terraform (terraform)
   Terraform se azure pr rg banana hai..
   Terraform ek declarative tool hai..
   Ek panna -> chameli.tf

Notepad | Chameli.tf | Are ek rg bana de..

↓

az login

↓

terraform chal na bidu

↓

RG bana dega mast
